

AMY LINDLEY

.NET Developer | C# Proficiency | SQL Expertise | Cloud Solutions

(615) 337-8617 @ amyklindley@gmail.com https://www.linkedin.com/in/amy-lindley-6b65b055 Nashville, TN

SUMMARY

Results-driven Software Engineer with 8 years of experience in full-stack development and API design, specializing in scalable backend systems using the ASP.NET stack. Notable achievements include enhancing system interoperability through high-performance API gateway integration and improving data consistency with a vendor communication system. Seeking a Software Engineer position where I can apply my full-stack development and API design expertise to contribute to innovative, high-quality system solutions.

KEY ACHIEVEMENTS

API Development Success

Architected & launched a database-driven API Gateway in ASP.NET Core on AKS, with OAuth2, Polly resilience, and runtime vendor routing—cutting partner onboarding from ~5 days to under 2 hours.

Containerization

Containerized a legacy .NET console app with a multi-stage Dockerfile (correct ENTRYPOINT/WORKDIR), enabling true local Docker dev parity and cutting setup time.

Data Security

Engineered encryption of SSNs and API keys using Azure Key Vault and custom C# hex-converter methods alongside SQL Server functions—passed HIPAA/PCI audits with zero findings.

Performance Optimizer

Replaced EF Core with Dapper for high-throughput claim endpoints, slashing average query times by ~30% and simplifying SQL mapping.

SKILLS

Active Directory		API	API Development		Relational Databases		API Gateway		APIs	Azure	Azure DevOps
CI/CD	Code Review		Data Mapping		Database Design		DevOps	Git	GitHub	JavaScript	JSON/XML
Kubernetes		MDM	Microservice Architecture		MVC	Oauth2	PowerShell		RDP	Restful APIs	
Sharepoint	SQL	SQL Server	SSRS	Docker	NPM	ESLint	HTML	CSS	Agile	ASP.NET	
Bootstrap	Entity Framework		PLSQL	Unit Testing	Visual Basic		Kanban				

EXPERIENCE

09/2023 - 02/2025

Franklin, TN

Software Engineer

EnableComp

- Spearheaded the development of a custom API gateway, integrating legacy systems with modern microservices on Azure, Kubernetes, and Docker, improving scalability and reducing integration overhead.
- Built a vendor notes system, supporting flat file and API-based communication, enhancing data consistency.
- Developed RESTful APIs, automating transactions and reducing manual processing.
- Engineered JSON-to-ACCORD XML transformation pipelines, improving interoperability and reducing errors.
- Implemented automated testing using xUnit, ensuring API reliability and reducing regression issues.
- Utilized Azure DevOps, GitHub, and Docker to streamline CI/CD automation, ensuring faster, more reliable deployments.
- Collaborated with cross-functional teams, refining requirements and resolving integration challenges.

01/2021 - 04/2023

United States

Computer Systems Analyst

Precise Systems

- Developed reusable Vue.js UI components with lazy loading for improved performance.
- Implemented Server-Side Rendering (SSR) with Nuxt.js, optimizing initial load times.
- Integrated Vue.js frontend with RESTful APIs, enhancing responsiveness.
- Assisted in C# API enhancements for scalable microservices.
- Optimized large T-SQL queries, reducing execution times.
- Implemented feature switches to enable controlled rollouts and reduce deployment risks.
- Participated in code reviews, ensuring best practices and maintainability.
- Used GitHub and Azure DevOps for source control and CI/CD.
- Collaborated with design, business analysis, and maintenance teams to develop and implement software solutions, ensuring alignment with user needs and system requirements.

EXPERIENCE

10/2018 - 01/2021

Greater Nashville Area, TN

Advanced Software Developer

Tennessee Bureau of Investigation

- Developed a VB.NET module to track and resolve duplicate DNA records, saving thousands in processing costs.
- Built a .NET Core 3.0 API, integrating with an MVC 4 application for records management.
- Designed and migrated a SQL Server database, optimizing legacy data for efficiency.
- Automated reporting and email notifications for training compliance.
- Mentored junior developers, assisting with code reviews and best practices.
- Refined coding standards in collaboration with the lead developer.

07/2017 - 09/2018

Franklin, TN

Associate Application Engineer

Community Health Systems

- Designed and implemented Citrix Zen Mobile (MDM) solution for use with hospital equipment
- Designed and implemented PTO web application for submitting, approving and managing PTO requests currently used by more than 300 employees across several departments
- Designed and implemented tool for Customer Resolution Center department for rounding with hospital IT staff and ensuring we are providing the best service to our hospitals
- Increased team productivity and automated repetitive tasks by utilizing batch files and PowerShell, and modifying existing scripts

EDUCATION

2015

Murfreesboro, United States

Bachelor of Business Administration (B.B.A.), Computer and Information

Middle Tennessee State University

CERTIFICATION

Secret Security Clearance

Inactive; Est. 2021
